

Thyrus for Ino

Date

2011

Medium

metal, pins, string, plastic, wire, spray paint, found magnifying glass, goat hooves, sandbag, and coconut shells

Description

In regards to all the components of the Hundley sculpture everything is attached to the piece. It's all relatively secure but things do hang off the piece and can sway. The rods of the piece are secured inside the slat crate to try and limit the motion of the piece. The base of the sculpture is one piece that has the three legs. This piece has a pipe that the upper section slides into and has a set screw to hold it in place. The two were taken apart to bring the height of the crate down but both are packed together in the crate.

Dimensions

112 x 94 x 54in. (284.5 x 238.8 x 137.2cm)
